

eviFile is an innovative digital real-time workflow tool that is making users up to 40% more efficient with tamper proof quality of evidence.

eviFile securely captures, manages, shares and tracks digital evidence throughout a workflow to preserve and authenticate a visible chain of proof. Here's how it works:

"eviFile has streamlined and simplified our processes, providing real-time data and the insight to make actionable decisions, reduce risk and deliver a higher quality project." Peter Webb, Director of Electrification Delivery, Balfour Beatty, Rail business.

Key benefits

- ✓ **Standardised process**
Using a single data format and collaboration platform improves operational efficiency.
- ✓ **Workflow planning**
Improve work planning and scheduling - getting it 'right first time'.
- ✓ **Quicker response times**
Richer, more accurate, real-time data means you can respond swiftly to changes at site level.
- ✓ **Location specific**
Locations can be mapped, tracked and viewed using Google Maps and Google Street View.
- ✓ **Supply chain**
Accelerate supply chain progress reporting and completion approval processes.
- ✓ **Reports**
Managers can generate reports from eviFile in CSV or PDF format and make instant data-driven decisions on live projects.

Proof Edition: From £8/user/month

**Proof is the easiest way to introduce the eviFile standard into a project.
It is quick to deploy and simple to use.**

eviTrack

Showing your route and associated eviFiles. Provide accurate, location-based journey data tightly linked with eviFile to deliver all of the benefits of both tracking and evidence.

Geo-tag

Your eviFiles provide GPS location information for avoidance of doubt. Pinpoint accuracy - an eviFile is easy to find and to place and will flexibly enable your field force to accurately capture location.

Digital evidence

Your eviFiles are photographic proof for suppliers and court. No friction, no fuss, no timewasting - just the absolute proof you need captured in seconds and stored securely forever. ACPO Compliant.

Digital forms

Capture the right data at the right time and drive the MI you need to make better decisions. Intelligent validation of data capture also provides increased quality and speed.

Enterprise Edition: From £35/user/month

Enterprise is recommended for organisations that require advanced workflow, integration and custom reporting. It includes all the features of the Proof Edition plus:

Workflow

Advanced, custom workflow component to manage a process, multiple eviFiles and forms. Capture information needed at each stage of any process with the data needed to back it up.

Smart work assignment

Right person, right job, right time. Ensuring you have control over how work is distributed. It will streamline the process, increase quality and reduce cost.

Progress of work done

Real-time reporting of job status and the activities being completed in the field allows for complete transparency into the work being completed by employees and contractors and allows managers to react quickly to change.

Interactive reports & dashboard

Access through the web application or your preferred package. Full transparency - single source of truth from an integrated reporting solution or with connectors into your own Management Information platform.

Asset management

A fully integrated inventory solution implementing your programme assets into the solution couples real time tracking with eviFiles to provide an end to end solution.

Dedicated vault

Secure, safe, peace of mind - cloud and government level security as standard with every eviFile instance.
